

Reduce your payroll time & costs
Using the latest facial recognition technology

The more reliable faster alternative to finger print readers

BioTime Face Facial biometric clocking in system

Employees clock in and out with their face - Completely eliminating attendance fraud.

Real-time display of who's on site from any PC or device. Automatically highlights lateness, early departures and unauthorised absence.

Eliminates attendance fraud, saving you on average 2 - 5% on payroll costs - no more paying for time employees are not present.

Hygienic, non-contact facial recognition system recognises employees in less than a second - Simply look and go.

Comprehensive software calculates employees' hours and overtime according to your working patterns, saving you time and money.

Graphical holiday, sickness and absence planning allows you to manage who is away and when, ensuring too many employees are not away at the same time.

Expanded report suite and custom report generator - Print or output to PDF, Excel or CSV file

Now with anti-spoof technology - detects for a live face so can't be fooled!

TCP/IP Network Connection

USB Memory Stick

WiFi Network Connection

Employees clock using face, card / fob

Clocking data is collected via WiFi network or via USB

View and edit employee information on screen

Produce reports to print or export to a file

Export payroll data to your payroll package

The future of biometrics is here...

The BioTime Face clocking in system positively identifies each employee by scanning their unique facial profile - completely eliminating employees clocking in and out for each other. This latest generation biometric technology is a hygienic, robust and more reliable alternative to fingerprint readers as the employee does not need to touch the reader.

When employees clock in and out, the clocking data is sent across your network or over WiFi alternatively it can be collected on a USB memory stick. The BioTime face software then automatically calculates each employees working hours based on your working schedules or shifts. The user friendly software allows you to view everything on screen and edit data as required, before printing reports or exporting data into a payroll package such as Sage Payroll.

The BioTime Face clocking terminals can be located at remote sites and send their data back to a central location, allowing you to stay in control of your employees' time and attendance at all times.

The BioTime face clocking terminal

Latest generation in biometrics provides unsurpassed reliability and completely eliminates attendance fraud.

Simply look and go to clock in and out - Non-contact and ultra hygienic.

Now with built-in RFID Proximity card or key fob reader.

Large clear display and audible confirmation of employee clockings.

Quick and easy to setup for new starters.

WiFi, TCP/IP Network connection or USB Memory stick collection of clocking data.

Mains powered (includes plug in transformer).

Wall mounted (Includes wall mount and accessories).

Robust ABS construction, suitable for virtually any work place.

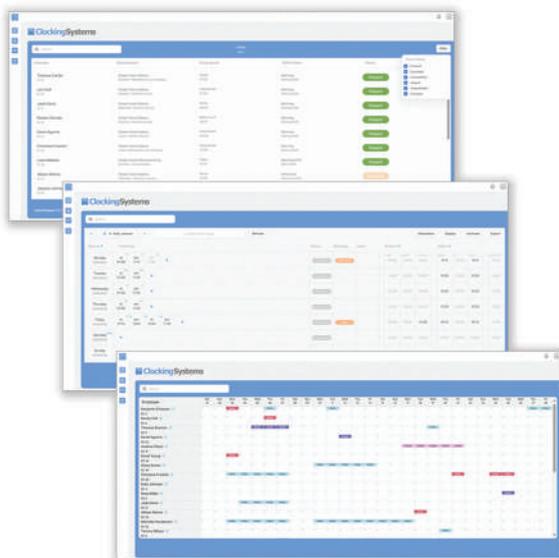

Dimensions: 150 x 140 x 30mm (H x W x D)

Now with anti-spoof technology - detects for a live face so can't be fooled!

The BioTime software - Multi-user, with real-time who's in display

Calculates all types of working hours and overtime, removing all manual calculations saving time and money.

Standard or flexible working times for each day of the week may be setup per employee or groups, with easy to follow setup wizards.

Automatic highlighting of anomalies - lateness, absence, missed clockings, exceeded breaks etc.

Allows lunch and break clockings or automatic deductions.

On screen editing of clocking data and automatic re-calculation of hours. (Audit log to show if clockings have been added or altered).

Advanced leave recording for holidays, sickness, training etc, with the ability to create customised leave types.

Comprehensive reporting suite and generator with detailed or summary reports for employees, branches and departments.

Extremely easy to setup and use software - accessible any time, anywhere from any PC or device.

(Compatible with all Windows & Mac operating systems).

Export facility to PDF, Excel, CSV and link to payroll packages.

Built in backup and restore facility for the database, with an archive database for leavers.
